

Double Diverging Radial Collimator

Technical Characteristics:

- Focus: FWHM 1.9mm
- Mean Foil Length: 220mm
- Radius for start of MFL: 380mm
- Mylar Foils: 56
- Foil Thickness: 0.023mm
- Foil Thickness Coated: 0.083mm
- Apertures: 57
- Angle Between Foils: 0.1217°
- Active Opening 6.9°
- Angle of Divergence in Vertical axis: 5.38°
- Absorber: Gadolinium Oxide
- Manufactured to Interface with a Rotating Collar.

One of three Double Diverging Radial Collimators
Manufactured for (SALSA) ILL Grenoble France
